

Solar-Powered Customer Generation
Interconnection Agreement (≤ 30 kW-AC^{CEC})

1. Customer intends to operate and maintain a _____ kW-AC^{CEC} solar electrical generating facility at the City of Los Angeles Department of Water and Power (LADWP) service address of _____

_____ in parallel with LADWP's transmission and distribution facilities, and/or Customer intends to have an entity or person perform one or both of these functions on Customer's behalf at such service address.
2. Customer understands and accepts that the solar electrical generating facility described in Section 1 above shall not be operated in parallel with LADWP's transmission and distribution facilities until LADWP has completed an inspection of such solar electrical generating facility and authorized connection with LADWP's transmission and distribution facilities.
3. Customer understands and accepts that if LADWP determines, after review of Customer's generation specifications for the solar electrical generating facility described in Section 1 above, that a LADWP Facility must be constructed and modifications made to LADWP's system for the safe operation of such solar electrical generation facility in parallel with LADWP's transmission and distribution facilities, Customer shall pay an amount equal to LADWP's estimated costs prior to any work being undertaken by LADWP.
4. Customer understands and accepts that operation of a solar electrical generating facility larger than described in Section 1 above at the service address stated in Section 1 above in parallel with LADWP's transmission and distribution facilities is a basis for disconnection, at the sole discretion of LADWP, of the solar electrical generating facility from LADWP's transmission and distribution facilities.
5. Customer understands and accepts that operation of a solar electrical generating facility larger than 30 kW-AC^{CEC} at the service address stated in Section 1 above in parallel with LADWP's transmission and distribution facilities requires Customer to sign a different form of Solar-Powered Customer Generation Interconnection Agreement than this form.

The signatory hereto represents that he or she is appropriately authorized to sign on behalf of _____, a customer of LADWP (Customer).
